

Wonde CSV Export

Please note that it is essential you review the data exported from Wonde prior to importing to your Renaissance sites.

Some data cannot be exported from your MIS and requires manual entry on the CSV files before you import. This includes the following columns -

Renaissance:

Course (required)

Username (optional)

Password (optional)

myON:

Students & faculty file – School_ID (required)

Students & faculty file - Username (required)

Students & faculty file - Password (required)

Freckle:

Teachers file - School_ID (required)

Please note that the year group/grade column will only populate numbers. If Reception students are exported this column will appear empty and will need the letter R manually entered. Please check students are listed in the correct year groups if you are carrying out a whole school export.

Requesting Access

If you have not already approved the connection between your Renaissance product(s) and Wonde you will see the below icon(s) when logging in to your Wonde portal. If these icons do not appear, please contact uksupport@renaissance.com to request access.

Existing Customer Wonde Guide

If you have existing student, teacher or class data on any Renaissance platform, there may be certain adjustments you will need to make to each file after exporting from your Wonde portal to ensure maximum accuracy when matching student data during the import process.

Renaissance

- When exporting the CSV file from Wonde, select the identifier that is already in use for the student accounts on your Renaissance site.

Select Identifier

Select identifier

UPN

Wonde ID

MIS ID

Blank (if you select this option you will need to manually add the identifier you have used previously)

If these Identifiers do not match what is already in use, there are 2 options:

- a.

Select 'blank' as the identifier and manually input the IDs already in use.
- b.

Export the identifier you would like to use and ensure the appropriate matching criteria is selected when importing to the Renaissance site. For further guidance on importing please click [here](#).

Preview student matching

Select the rules for matching the students in your file with the students that are already in the system

Match on:

The system will automatically match students from the file with students with the same ID in the system.

Add more matching rules

☐ Same Year ⓘ

Student year in the import file must match exactly with the year in the system. If not, duplicate students might be created.

☐ Same School Enrollment: England Training School

Students must already be enrolled in the same school that has been selected. If not, duplicate students might be created.

Renaissance

See Every Student.

myON

- Select the identifier you are already using for your students. If none apply you will need to select 'blank' then manually enter the ID.
- To match teacher records, enter either the existing ID. Please note, if the ID does not match but the username does you will be able to merge records.
- Usernames/passwords will need to be entered on both the student and faculty files.

Note - if the Username and Password columns are left blank, students will be unable to login.

Freckle

Select the identifier already in use. If none apply, select blank.

Note - Freckle will merge student records if all the following are true:

- Both records have the same first and last name.
- Both records are assigned to the same school.
- Both records are within one year of each other.
